RPN & RN

Getting you the right help!

Excellence & Compassion

We believe in all-around excellence backed by a team of compassionate Care-givers who goes above and beyond to support you or your loved one.

Our Nurses are qualified attendants who are at the front line in health care . they provide generalized and specialized care to all demographics. Our registered practical nurses are college-taught professionals who use their skills, education, and common sense to assist patients with general or straight forward health conditions in any home or healthcare facility. Registered nurses working with all our clients have extensive knowledge in nursing which allows them to help patients with more complex health issues.

To access your needs, one of our area coordinators will work directly with you to evaluate your personal needs and thereafter creates a plan that's tailored to your specific needs.

Assessment & Case Management

- ✓ Assess patient health care needs (physical, emotional, psychological, and spiritual) to identify appropriate nursing interventions
- ✓ Analyze findings of a health assessment
- ✓ Interpret patient health records
- ✓ Monitor, record & report symptoms & changes in patients' conditions
